

**2nd International Workshop on
Uncertainty in Greenhouse Gas Inventories
27 - 28 September 2007
International Institute for Applied Systems Analysis (IIASA)
Laxenburg, Austria
<http://www.ibspan.waw.pl/ghg2007/>**

Guidelines for the Retreat Sessions

Dear Chairpersons,

We suggest the following three guidelines in order to make the retreat sessions appear useful for summarizing the results of the Workshop and serving as a basis for a joint publication in the future (to be discussed further at the Workshop):

- Identify, with the help of all discussants, the state of the art in dealing with uncertainty in ‘your’ session of the Workshop.
- Identify, with the help of all discussants, those scientific areas in ‘your’ session of the Workshop that have been advanced vis-à-vis those which will require further research.
- Put, with the help of all discussants, ‘your’ session of the Workshop into a broader context by linking to the other sessions of the Workshop and attempt to identify the mutual benefits that might have occurred.
